Art Unit: 1745

The amendment filed 8/25/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the term "within less than about 10% of the optimal voltage", used to define the claimed recitation "substantially similar". Applicant is required to cancel the new matter in the reply to this Office Action.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3-6, 15-18, 21, 23 and 33-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. These claims contain the recitation "substantially similar", which is defined according to the new matter added to the specification, and thus themselves contain new matter which was not described in the original disclosure.

Claims 7-14, 24-31 and 39-47, for reasons of record, are allowed.

Applicant's arguments filed 8/25/03 have been fully considered but they are not persuasive.

Applicant states that the definition of "substantially similar" is not new matter, but does not point out where the original disclosure supports the recitation added into section 0078. None has been found in the present specification. If applicant believes that the recitation is supported, either in the present disclosure, or in a document incorporated by reference, applicant is requested to do so. Deleting the new matter from the specification would remove the §112 first paragraph rejection, but would reinstate the §112 second paragraph rejection, unless some other definition is given. Such a definition needs to have support in the original disclosure (including material originally incorporated by reference) in order to comply with §112 first paragraph.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
